Somerset Rose Nursery, Inc.

New Brunswick, N. J.

Somerset's Roses . . .

need no introduction to those who have used them. Most of our rose bushes are grown in the Pacific Northwest. Most of the climbing roses we grow here in New Brunswick. Budded on multiflora understocks with a few exceptions, every effort is made to deliver to you a healthy vigorous plant, ready and anxious to grow.

Grading is according to A.A.N. Standards.

Prices are quoted F.O.B. New Brunswick with packing at cost. Where cash accompanies order no charge is made for packing.

Shipping. All shipments travel at the risk of the purchasers. Due to the perishable nature of rose bushes, complaints, if any, must be made within 10 days of receipt of shipment.

Patented Roses

(All patented varieties are being grown under license from patent owners). Prices are those listed by patent holders.

Wholesale prices are determined by the individual retail prices.

CLOVERSET POTS

These have many advantages. They are light and cheap enough so that they can be included with the plant. Frost will not crack them. They require less watering than clay pots, and plants grow better. Use No. 0 for perennials and greenhouse use, No. 1 for perennials, No. 2 for roses and shrubs, No. 3 and No. 4 for large shrubs, trees and evergreens.

TREE ROSES

Good sales item — distinctive — eye catching
Offered by color but each tree labeled by variety.
Red — Pink — Yellow — White — Bicolor
\$3.55 each. Delivery early March.

SELL POTTED ROSES. They have many advantages. Your customers have no losses, you have fewer complaints. You offer a better article than they can purchase in the cut rate stores and you build customer satisfaction.

POTTING IS EASY. Use any reasonably good soil, mix with it one-quarter rotted cow manure or peat moss. Firm soil tightly around the roots, using hammer handle or cut broom stick. Soil should be moist but not wet. Leave a rim of about 2 inches at top of pot. Water thoroughly immediately after potting and place in a position away from wind and drafts. Keep moist but after first watering soil should not be kept wet. Best results are obtained if tops of bush roses are cut back to 6 or 8" and climbers to about 12 inches. This should be done before potting. Feed with liquid fertilizer, after buds form.

PROTECT ROOTS of roses against drying or extremes of temperature at all times. They are perishable.

Hygro

Soluble Plant Food

Unexcelled for liquid feeding of all plants. Use 1 oz. to gallon or 3 lbs. to 50 gallons of water. Will make plants really jump, with rich dark green foliage.

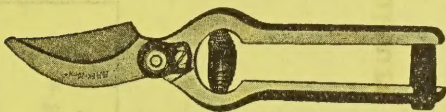

_____ 10 lb. - \$4.35

_____ 25 lb. - \$8.25

_____ 50 lb. - 15.75

_____ 100 lb. - 29.95

*When you prune—
you need a good shear.*

No. 24. Modeled after the well known Kunde pattern. Forged from high class steel, honed edge, leather catch, security plate for bolt. Moderately priced considering quality. 8" long.
